Education

University of Illinois at Chicago

B.S. in Computer Science
Chicago, Illinois

Skills

Design

End-to-end product design · UX research · Usability testing · Interaction design · Design systems · Responsive design · WCAG accessibility · Wireframing · Prototyping · Information architecture · Data-informed design · A/B testing

Tools

Figma · Sketch · Adobe CC · Hotjar · FullStory · Miro · JIRA · Confluence · Webflow · Higgsfield · Midjourney · Claude

Technical

Claude Code · JavaScript · TypeScript · React · Git · Swift · HTML · CSS · Design QA · Agile workflows

Certifications

Google Data Analytics Certificate · Visual Elements of UI Design, CalArts · Software Engineering Virtual Experience, JPMorgan Chase

Work Experience

Product Designer, CarAi

03/2025-05/2026

- Owned end-to-end design of conversational AI interfaces for automotive dealerships, covering contact center, automated service status updates, and booking flows, shipping responsive and accessible experiences.
- Owned prompt creation and customization for CarAi's calling and SMS agents, adapting agent behavior to individual dealership requirements and testing agent responses to maintain accuracy across different communication channels.
- Designed AI-driven workflows that unified customer data, call logs, and booking history into a single operator view, directly reducing task-switching and improving contact center efficiency.

Product Designer, EV.com

09/2024-05/2026

- Designed EV360 analytics modules (Charging and Range, Battery Health, EV Savings), translating large datasets and predictive insights into interactive dashboards that improved user comprehension and increased average session duration.
- Initiated and implemented a design token architecture in Figma, enabling consistent cross-platform handoffs and significantly reducing time spent on design updates across desktop and mobile.
- FullStory to identify usability issues and high drop-off points, then iterated on page layouts and navigation flows, leading to improved task completion and conversion across key user journeys.

Lead Product Designer, Qtap

09/2023-09/2024

- Led end-to-end design of a no-code web creation platform from discovery through delivery, including user research, information architecture, wireframes, and high-fidelity UI, resulting in a more intuitive product experience for non-technical users.
- Established the company's first design system and component library, aligned with the front-end framework, which reduced design inconsistencies and accelerated feature development cycles.
- Ran usability research on the registration and onboarding flow, identifying key friction points that led to a simplified setup experience and a measurable reduction in support requests after launch.

Product Designer, Estaga

06/2023-09/2023

- Redesigned consumer-facing booking flows using usability testing to surface and resolve UI friction, improving booking completion rates and increasing user trust in the listing experience.
- Integrated Zapier automation into listing management workflows, eliminating manual steps for hosts and reducing time to complete the end-to-end listing creation process.
- Delivered a visual strategy refresh backed by behavioral data, improving listing presentation quality and driving higher engagement across the marketplace.

UX/UI Designer, Neuweb LLC

09/2022-06/2023

- Conducted usability testing and journey mapping across multiple client products, identifying and resolving navigation pain points that reduced user drop-off and improved overall flow completion rates.
- Designed and shipped responsive UI improvements in close collaboration with developers and stakeholders, resulting in stronger user engagement and higher usability scores across tested flows.

Project Manager, Placement International

09/2021-11/2021

- Led website redesign initiatives, delivering wireframes and prototypes to leadership, and improved chatbot onboarding UX via HubSpot, increasing qualified lead conversion and alignment between design and development teams.
- Facilitated Agile methodology training for 100+ employees and optimized the JIRA board UX, reducing task completion time by 10% and increasing overall team efficiency by 12%.

Project Manager, Beeline

05/2021-09/2021

Web Developer & Designer, Q-Art Web Studio

04/2019-01/2021
